- Marketing Analytics: GA4, AppsFlyer

### Education

08/2016

Netaji Subhash Engineering College

Kolkata, West Bengal

B.Tech.: Information Technology

### Honors & Awards

SwiggyStar Award - Aug'23

- **Retail & Store Performance Analytics:** Built store-level analytics frameworks to track **sales, customer acquisition, and product performance across cities and outlets**, supporting expansion and operational strategy.
- **Data Infrastructure & BI Enablement:** Developed scalable analytics workflows using **BigQuery, Python, and BI dashboards**, enabling cross-functional teams to self-serve insights and make faster data-driven decisions.

### Swiggy - Manager, Category Analytics

Bangalore, Karnataka

10/2022 - 08/2025

- **Team Leadership:** Led and mentored a **5-member analytics team** driving category growth, advertising analytics, and inventory optimization across cross-functional stakeholders.
- **AI & Decision Intelligence:** Built **Category Mitra, an LLM-powered analytics assistant integrated with Snowflake**, enabling natural language insights and reducing dependency on manual SQL analysis.
- **Brand & Customer Intelligence:** Developed automated **Brand Insight reports** across cities and dark stores analyzing share of voice, retention, and customer mix, influencing **₹1.8 Cr+ monthly business impact**.
- **Retention & Forecasting Analytics:** Designed **Brand × Category cohort frameworks and GMV forecasting models (~92% accuracy)** to improve retention insights and support proactive supply planning.
- **Inventory & Pricing Optimization:** Built **assortment optimization and price elasticity models (Python)** improving product availability and driving **~9.2% monthly GMV growth**.
- **Ads & Revenue Analytics:** Developed campaign attribution and ROI measurement models linking ad spend to GMV growth while **automating offer workflows saving ~₹4L weekly costs**.

### Swiggy - Business Associate

Bangalore, Karnataka

08/2021 - 09/2022

- Built dynamic **ads performance dashboards** across multiple ad properties enabling campaign optimization.
- Designed automated **sales reporting dashboards** providing daily, weekly, and monthly business insights.
- Led the development of NPI / BDPO / SDPO operational tracking systems to streamline product launches and promotional offer uploads, improving workflow efficiency for category teams and saving **~2 hours of manual effort per day**.
- Implemented automated data validation frameworks improving **data accuracy and operational reliability**.

### Blackbuck - Business Analyst

Bangalore, Karnataka

02/2021 - 08/2021

- **Reporting Automation:** Built automated daily, weekly, and monthly performance reports to provide the sales team with timely and accurate insights.

- **Data Audit Framework:** Implemented an audit mechanism to validate ground sales meeting records, improving accountability and data reliability.
- **Workflow Automation:** Developed automated data pipelines using **Google Apps Script and MySQL** to integrate data and generate multiple Google Sheets reports, enhancing operational efficiency.
- **Incentive System Automation:** Led development of an automated incentive payout system for **ASMs, TSLs, and CROs**, replacing a 3-day manual process with a scalable, accurate solution for performance-based payouts.

### Apollo 24|7 - Business Analyst

Hyderabad, Telangana

07/2020 - 02/2021

- **Performance Reporting:** Delivered daily, weekly, biweekly, and monthly performance reports, enabling stakeholders to make timely, data-driven decisions.
- **Dashboard Development:** Built Google Data Studio dashboards to track key business metrics across multiple dimensions, improving visibility and saving ~3 man-hours daily.
- **Platform Implementation:** Led implementation of a scalable **Drupal-based CMS** to centralize medicine content management, eliminating duplicate manual workflows and enabling efficient collaboration and version control.

### Medcords Healthcare - Business Analyst

Pune, Maharashtra

11/2019 - 07/2020

- **Business Analytics & Insights:** Delivered data-driven analysis and actionable insights to solve business challenges, identify growth opportunities, and support strategic decision-making.
- **Process Optimization & Automation:** Mapped operational workflows, identified bottlenecks, and built an automated doctor allocation & case management system, saving ~3 hours of daily operational effort.
- **Performance Reporting & Growth Insights:** Developed analytical reports and dashboards to track business metrics, guide stakeholders, and uncover sales optimization opportunities.

### Ola Cabs - Analyst

Bangalore, Karnataka

07/2018 - 06/2019

- **Fraud Pattern Analysis:** Analyzed customer and partner behavior to detect fraud patterns and identify potential re-completion fraud cases, enabling targeted product fixes.
- **SQL-Based Fraud Detection:** Built SQL-based detection systems to identify off-platform transactions and misuse, enabling enforcement actions that generated ~₹5L in average daily fraud penalties.
- **Risk & Process Improvements:** Recommended process improvements based on analytical insights to reduce operational and financial risks.
